ABOUT US

We are pleased to introduce ourselves as a leading PP Yarn manufacturer in India, equipped with state of art BARMAG manufacturing facility located at Kuha (Ahmedabad), Gujarat to produce best in class products like PP Crimp Yarn, FDY and PP Filler Cord in variety of Denier from 130D – 2000D with Normal to High Tenacity.

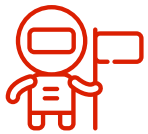

PPMF Industrial yarns are manufactured using ultra-modern BARMAG Machinery and technology. Our high-tech manufacturing units conduct every manufacturing process in-house including spinning, twisting, winding, texturizing & are equipped with specialized machinery that is essential to test the numerous features of PPMF industrial yarns and its products. Also, our clients have the options to choose from Single, as well as Multiple Ply Yarns, based on the requirement. Our industrial polypropylene threads are strong, flexible, durable, soft, silky, smooth, moisture resistant, and antimicrobial & bacteria free.

OUR VISION

- To produce products of international standards
- To stitch the world's transition to sustainable yarn
- To be customer-focused through stringent quality assurance and continuous innovation

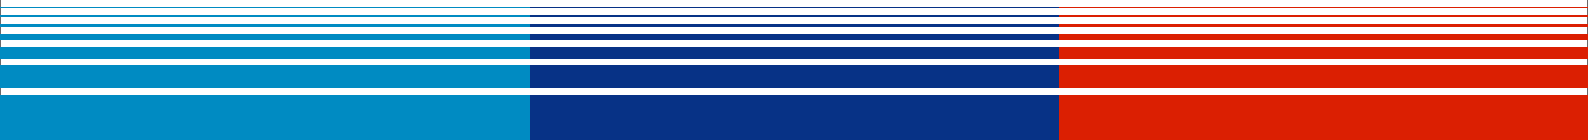

OUR MISSION

- To create the most compelling yarn company of the 21st century by one stop solution
- To encourage people's ownership, empowerment and working under team structure
- To manufacture at an affordable cost that provides our customers with a competitive advantage
- Strive to maintain an edge over our competitors due to consistent product quality and low operating costs

OUR VALUES

- Integrity and honesty in business Encourage creativity and innovation to drive people, products and processes To protect the environment and community

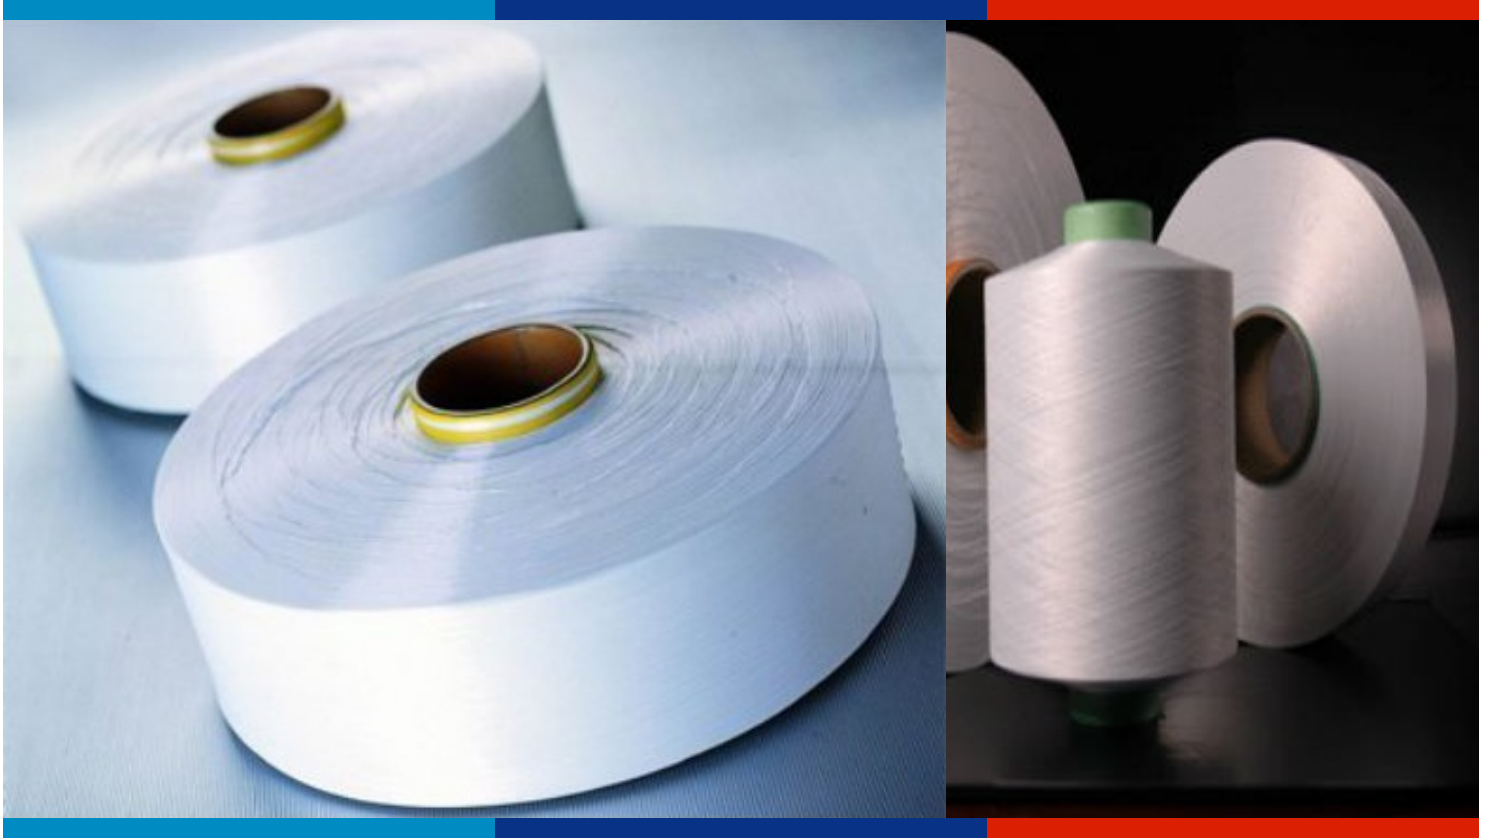

PRODUCTS

- Partially Oriented Yarn
- Polypropylene Texturised Multi Filaments Yarn
- Polypropylene High Elongation Yarn
- Polypropylene Filler Cord
- Fully Drawn Yarn

PARTIALLY ORIENTED YARN

POY is a type of PP filament yarn yet to be processed through the drawing process, which is the primary form of PP filament yarn made through the polymerizing and spinning processes.

It is primarily used as a main raw material for DTY. POY is primarily used by us as a raw material for our production of DTY. Any POY not consumed by our DTY production capacity is sold separately as end products.

PP CRIMP YARN

We offer a wide range excellent quality Polypropylene Texturised Multi Filaments Yarn.

Range Of Denier :

- 130 PP Texturised Crimp Yarn
- 130×2 PP Texturised Crimp Yarn
- 280 PP Texturised Crimp Yarn

Application:- Socks, Tights, Panty hoses, car upholstery, Furniture upholstery, Soccer/sports socks, Ribbons, Nets, Dyeing Hoses, Filtration Fabric, Laces, Swim wear, Sports wear, Under garments, Seamless. All knitting and weaving application (warp & weft) etc.

PP HIGH ELONGATION YARN

Polypropylene High Elongation Yarn as per international standards and are manufactured under quality controlled environments with highly developed machinery. Also we manufacture as per customer requirement. Our industrial polypropylene threads are strong, flexible, durable, soft, silky, smooth, moisture resistant, and antimicrobial.

Range Of Denier :

- 210 HE (High Elongation Polypropylene Yarn)

Application:- Ribbons, Laces, Swim wear, Sports wear, Under garments, Seamless. All knitting and weaving application (warp & weft) etc.

PP FILLER CORD

We also produce our in-house filler cord for the Sift proof seams, also known as the dust proof seams and offer the same to our clients as the accessories. This filler cord is made from polypropylene material. These filler cords are specially made to offer a total dust proof solution to our customers around the Globe.

PP Filler Cord is available in various dimensions and Weight.

Application:- Used in the FIBCs Bags.

PP FDY

FDY is a type of highly drawn PP filament yarn which can be used to produce high strength fabrics and textiles. We produce both semi-dull FDY . FDY is typically used to produce fabrics and textiles for high-end undergarments, high-end sportswear and home furnishings.

Normal Partially Oriented Yarn (POY) needs to be necessarily texturised before being used for making fabric whereas FDY, as the name of the yarn itself indicates, is drawn fully during the process of spinning itself and therefore does away with the requirement of texturising and can use directly for making fabric.

Application:- Used In Fibre Bags, Geo Textile Fabrics, Filter Fabrics, Woven Sacks, Webbing (tapes), Sofa Sets, Safety Belts, Manufacture Braids, Manufacture Ropes

APPLICATION

Narrow-Woven Fabric

Safety Belts

Stitching & Webbing of FIBC Bag

Geo-textile woven fabric

PP Slings

Industrial Fabric & Bags

Bottom closing of woven sack

PP Mats

APPLICATION

Filter Fabric

Mouth closing of woven sack

Fishing Nets

Safety Nets

Ropes

Reinforcement of construction material

Window Seal

Braided Cords
